

Our Commitment to Sustainability Began With Ideas. Today, it's About Action.

EXECUTIVE SUMMARY

With over 100 Leadership in Energy and Environmental Design Accredited Professionals (LEED APs and GAs) on staff, sustainable design weaves through all Langan services. Our diverse portfolio of intelligent site planning, design, and engineering coupled with our brownfield and site remediation expertise places us at the forefront of the sustainable design movement. Langan has been an instrumental player on dozens of LEED and sustainable design projects. Our expertise allows us to make significant contributions in developing sustainable sites with an emphasis on stormwater management, low impact landscapes, brownfield redevelopment, sustainable remediation, materials recycling, energy conservation, and renewable energy design. Langan's technical services involve best practices that lead to a sustainable future. We believe that individuals and organizations will thrive in a future built on the principles of sustainability. We are committed to helping build that future through our technical expertise in sustainable matters, as well as our internal operations and corporate environmental stewardship.

To support Langan's corporate sustainability vision, we are setting measurable goals that correspond with our company's core values and the three pillars of sustainability: financial, environmental, and social. We pursue excellence in everything we do; our other core values and corresponding sustainability goals include:

Commitment to our clients' success

- Pursue strategic growth in core business areas and expand sustainability services
- Establish a Langan “Sustainability Project of the Year”
- Develop and launch a carbon calculator template for projects

Knowledge to benefit ourselves and our clients

- Expand “green” and paperless office practices
- Increase Green Team participation in each office
- New office space will be designed to maximize sustainability and mobility
- Increased employee incentives for using alternative means to commute, and have implemented a flexible work schedule

Opportunity for career growth, entrepreneurial spirit, and teamwork

- Enhance sustainability-focused in-house training and provide continual staff development opportunities related to sustainable design and engineering practices
- Maintain continuing education credentials
- Add sustainability topics as agenda items at corporate and staff meetings

Citizenship through the contribution of our time, skills and knowledge to foster positive change

- Cultivate and support a spirit of volunteerism focused on supporting sustainability organizations
- Internal office sustainability incentive and challenge programs
- Develop programs and support staff efforts to educate the general public about sustainability

We have set baselines for these goals and are measuring progress annually to evaluate our progress, adjust our goals and raise the bar.

See some of our sustainable related projects [here](#). Please ask us how we can help your company and projects reach an elevated level of sustainability.
