

An aerial view of a modern airport terminal building with a large tarmac area. Several commercial aircraft are parked at gates, with their tails visible. The terminal has a multi-story structure with a glass facade. In the background, there are hills and a cityscape under a blue sky with light clouds. The word "AVIATION" is overlaid in white, bold, sans-serif font on the right side of the image.

John F. Kennedy International Airport, International Arrivals Terminal, Queens, NY

Teterboro Airport, Flight Safety Facility, Teterboro, NJ

Since Langan began, we have provided engineering and environmental services at many local and regional airports. As the firm has expanded, the scope of our aviation projects has grown. We are often a key member of design teams leading preconstruction services for landside renovations and expansions, taxiway and runway support, hangar improvements, transit connections, and new facilities and infrastructure. Additionally, we have developed an environmental group that helps airline clients with their site needs from coast to coast.
