

Geographic Information Systems (GIS)

Data Driven, Solution Focused

Langan utilizes the latest software solutions designed to collect, manage, analyze, and visualize mass quantities of both spatial and non-spatial data to assist our clients in unlocking the full potential of their business data. We transform raw data into intelligent action, enabling the ability to make data-driven decisions confidently and efficiently.

Langan's technology solutions bring data to life, making it more accessible and actionable for users at all levels of an organization, translating to improved business outcomes, optimized operations, and increased competitive advantage. This enables our clients to harness the power of their data and turn it into a strategic asset that drives meaningful and transformative change in their business.

Our Value

Controlled Costs

Better data insight and access to quality information leads to reduction in project costs.

Innovation

Develop innovative web and mobile solutions that create value.

Better Insights

Drive insight from data results in better decision making. Ability to analyze trends and forecast.

Productivity

Spend less time managing and analyzing mass quantities of data increases productivity.

Centralization

Create one database instead of fragmented data in multiple locations.

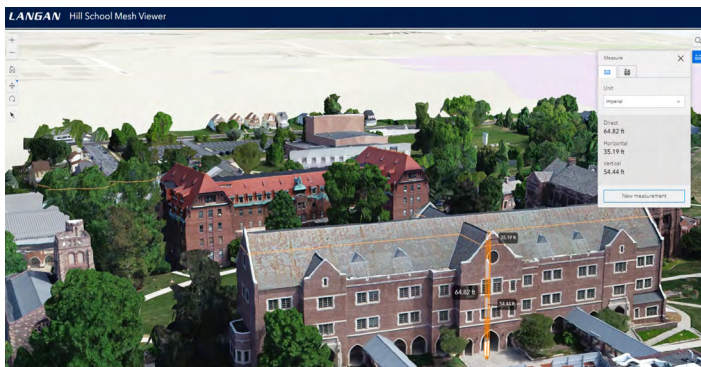

Reduced Risk

Reduce environmental and financial risk through enhanced QA/QC, visualization and data management.

GIS / Data Solutions Services

- Indoor-Outdoor Mapping & Analysis
- Field Data Collection / Real-Time Mapping
- Data Dashboards & Web Viewers
- Map-Based Document Management
- Data Interpretation, Management & Analysis
- Process/Workflow Development
- Spatial & Non-Spatial Data Integration
- GeoAI & Deep Learning Modeling
- Data Visualization
- Historical Data Acquisition
- Enterprise Software Integration
- Custom Solutions
- Site Analysis & Litigation Support
- Asset Management
- Indoor Mapping Systems
- Utility Network Management

Systems & Development Services

- System Architecture Design & Implementation
- Web & Mobile Application Development
- Automated Figure & Report Generation
- IoT / Real-Time Data Capture & Reporting
- AI / Machine Learning
- Cloud Hosting & Managed Services
- Process Automation
- Data Extract, Transform & Load (ETL) Services
- Enterprise Systems Integration
- Interactive Data Exploration
- Custom Viewers & Websites
- Custom Tools

Software Solutions

We have experience utilizing leading platforms to help accomplish our client's goals.
