

A modern, multi-story corporate office building with a glass facade, illuminated from within at night. The building is surrounded by palm trees and a landscaped area. The text "CORPORATE CAMPUSES" is overlaid on the right side of the image.

CORPORATE CAMPUSES

CORPORATE CAMPUSES

Bell Works, Holmdel, NJ

Like Langan, corporate campuses were born in New Jersey; AT&T's Bell Labs was the first in the 1940s. Since then, many major corporations have constructed facilities that foster community among employees and reflect company culture. Langan's integrated technical services in the design and development of master planned corporate campuses have provided incredible value to clients in a variety of industries. As a result, an infinite number of employees from companies whose brands are household names in America have been supported by Langan's services.

Bayshore Technology Park, Redwood City, CA

Oracle HQ, Redwood City, CA

Novartis East Campus, East Hanover, NJ

Lincoln Centre Life Sciences Research Campus, Foster City, CA
