PENN MEDICINE, THE PAVILION

Philadelphia, PA

In an effort to expand its rapidly growing network, Penn Medicine has assembled one of the first Integrated Project Delivery (IPD) teams on the East Coast for the design and development of a patient pavilion, located in Philadelphia's University City area. As part of the project team, known as PennFIRST, Langan is providing a multitude of services including site/civil, geotechnical, and traffic engineering, environmental consulting, permitting, and surveying.

MEMORIAL SLOAN KETTERING

New Jersey and New York

Langan has provided full-service engineering and landscape architecture services on multiple projects for the world-renowned cancer treatment and research institution.

NEW YORK-PRESBYTERIAN HOSPITAL

New York, NY

In 1994, New York-Presbyterian Hospital, the largest hospital in the U.S., underwent a \$1 billion modernization program that included a 12-story air-rights expansion over FDR Drive, the first such expansion ever. Langan was the geotechnical, foundation, marine, and environmental engineering consultant for the project, and continues to support expansion and renovations at the hospital.

ZUCKERBERG SAN FRANCISCO GENERAL HOSPITAL

San Francisco, CA

The Zuckerberg San Francisco General Hospital and Trauma Center is the only Level One trauma center serving 1.5 million people in the region. It is also the only hospital in San Francisco built with a base-isolated foundation, the latest technology for protecting buildings during seismic activity. Langan performed the geologic and geotechnical exploration for this new public hospital.
