

OFFICE BUILDINGS

INTERACTIVECORP HEADQUARTERS

New York, NY

Langan's integrated services helped overcome numerous technical challenges that ultimately transformed a former manufactured gas plant site into the Frank Gehry-designed IAC Building, which sits adjacent to the High Line and the Hudson River.

Team

The Georgetown Company
Frank Gehry
Adamson Associates
DeSimone Consulting Engineers

UBER HEADQUARTERS

San Francisco, CA

Langan's extensive history with this site, located in Mission Bay, was instrumental in moving this project forward. Our team provided geotechnical and environmental services for the 430,000-square-foot facility, featuring two buildings connected by three double-level bridges.

Alexandria Real Estate Equities
SHoP Architects
Thornton Tomasetti
Truebeck Construction

THE TOWER AT PNC PLAZA

Pittsburgh, PA

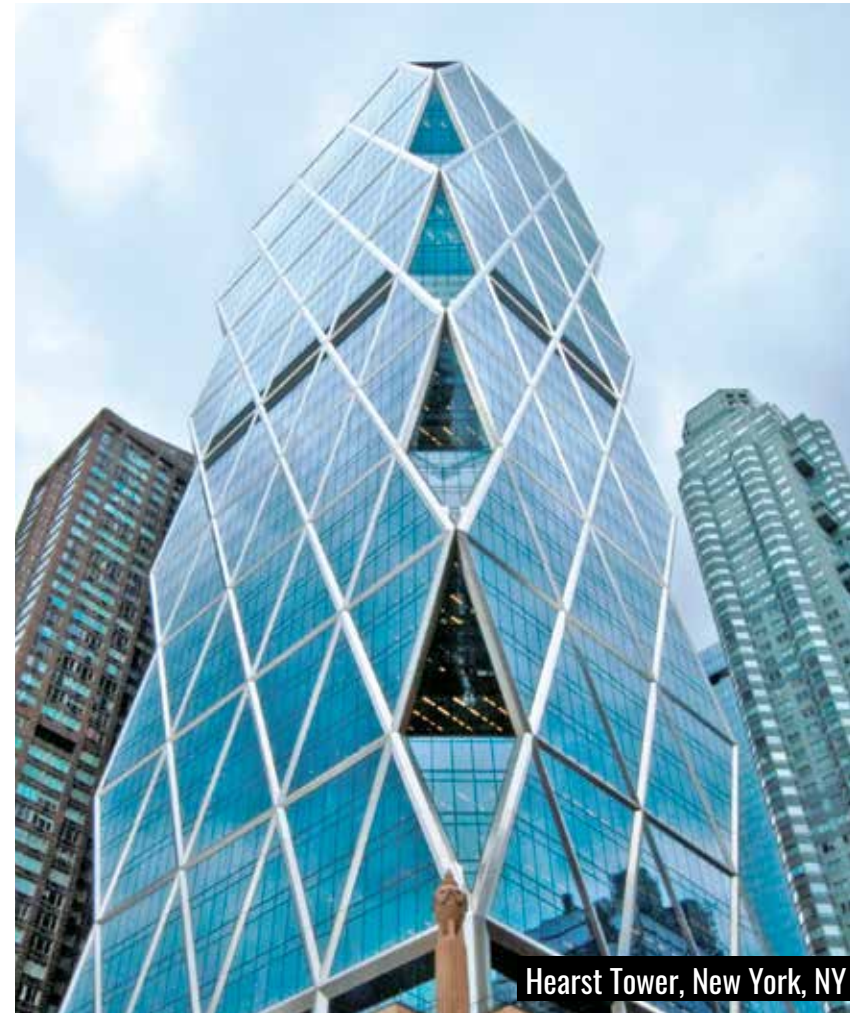

Langan provided geotechnical engineering services for this 33-story tower in the heart of Pittsburgh's downtown Financial District. Our team developed caisson design parameters for the building based on field load test data, test drilling results, and available site-specific geotechnical information.
