

# LANGAN

## EHS Management & Compliance

CHEMICAL INDUSTRY

Langan uses a systematic approach to plan, design, and implement management systems for EHS compliance tracking. Our services enable Langan's clients to increase operational efficiency and productivity, reduce risks, and enhance collaboration and transparency of operations while preparing for changing safety and environmental compliance rules and shifting economic conditions.

### Industry Challenges

- Ever-Changing EHS Regulations and Complex Permit Requirements
- Product Innovations and Development with Limited Time to Market
- Complex Supply Chain Network
- Increasing EHS Demands on Limited Company Resources
- Growing Public Scrutiny
- Complexity of Safe Operations & Incident Management
- Deluge of Data with Limited Information Management Capabilities

### Service Features to Address Challenges

- Supplier Transparency and Disclosures
- Chemical Substance Management
- Product Stewardship and Sustainability
- Environmental & Safety Incident Management
- Audits & Corrective Actions Management
- Regulatory Compliance Content Tracking & Reporting
- Environmental Emissions Management (Air, Water, & Waste)
- EPCRA Planning & Reporting
- Health & Safety (OSHA) Compliance Reporting
- Sustainability Monitoring & Reporting
- Information and Knowledge Management
- Corporate Requirements Tracking & Reporting

## Business Benefits From Our Services

- End-to-End Supply Chain Knowledge
- Global Product Compliance Assurance
- Improved Employee Health & Safety
- Enhanced Regulatory Compliance & Transparency
- Improved Business Performance
- Decreased Operational Costs
- Reduced Liability & Risk Exposure
- Increased Value & Sales of Products and Services
- Enhanced Reputation & Stronger Brands
- Robust Strategic Planning for Asset Protection
