

Curated Geographic Data at Your Fingertips

Developed by Langan's Digital Solutions team, Site Analyzer is a web-based mapping application that transforms complex geographic data into actionable insight—fast. It combines curated datasets with powerful visualization tools to support everything from site selection and due diligence to environmental review and regulatory reporting. Site Analyzer makes it easy to understand sites, share findings, and keep projects moving with clarity and speed.

Key Benefits

Extensive Curated Data

Tap into 140+ maps, global datasets, and detailed parcel data across multiple countries.

Built-in AI & Support

Navigate with AI, multilingual support, in-app tutorials, and responsive help.

Accelerated Site Evaluation

Quickly access parcels, land use, zoning, demographics, environmental risks, and more.

Seamless Data Export

Download spatial data in GIS and CAD ready formats for seamless integration.

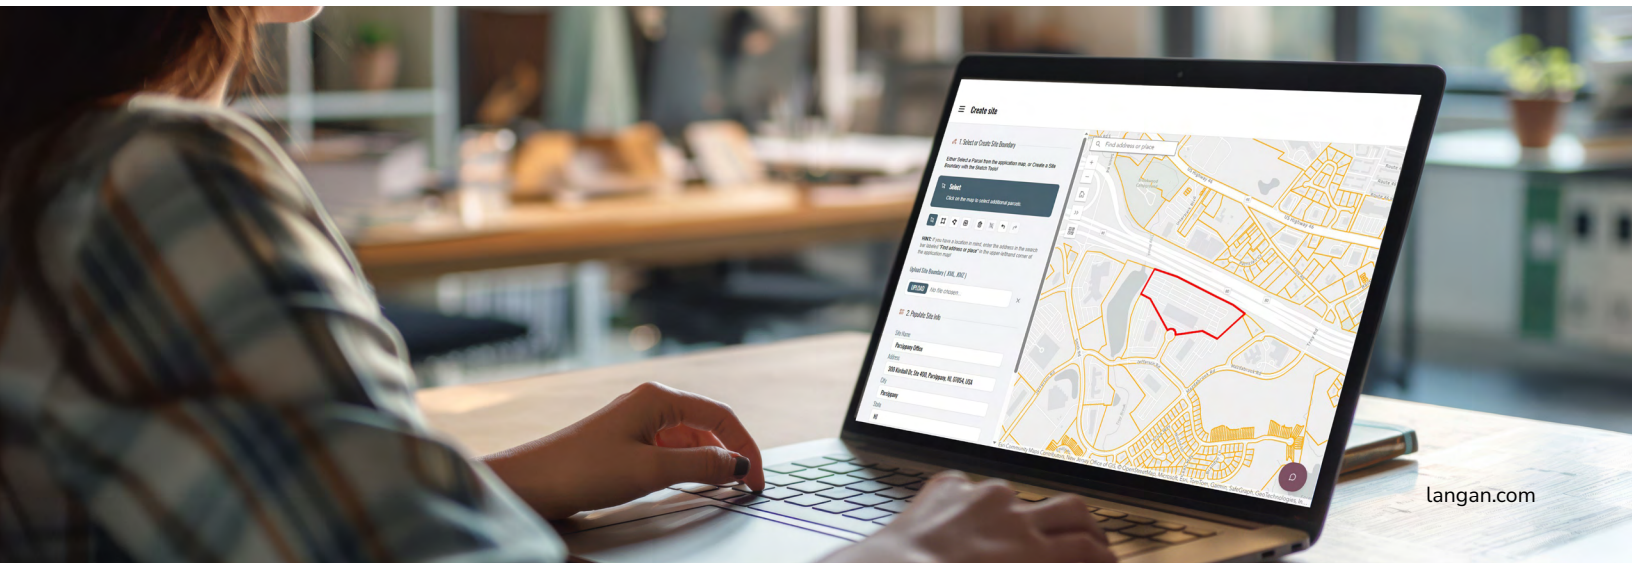

Instant Reports

Automatically generate summary reports from map data for quick, informed decisions.

Export-Ready Visuals

Easily create and export high-resolution figures and maps tailored to your project.

Industry Voices: Why They Choose Site Analyzer

“ Site Analyzer has been a great daily resource for preparing proposals or getting ready to visit a site. I can gather valuable information and visualize what to expect before setting foot on-site. It’s a powerful tool that helps me create report figures in minutes. ”

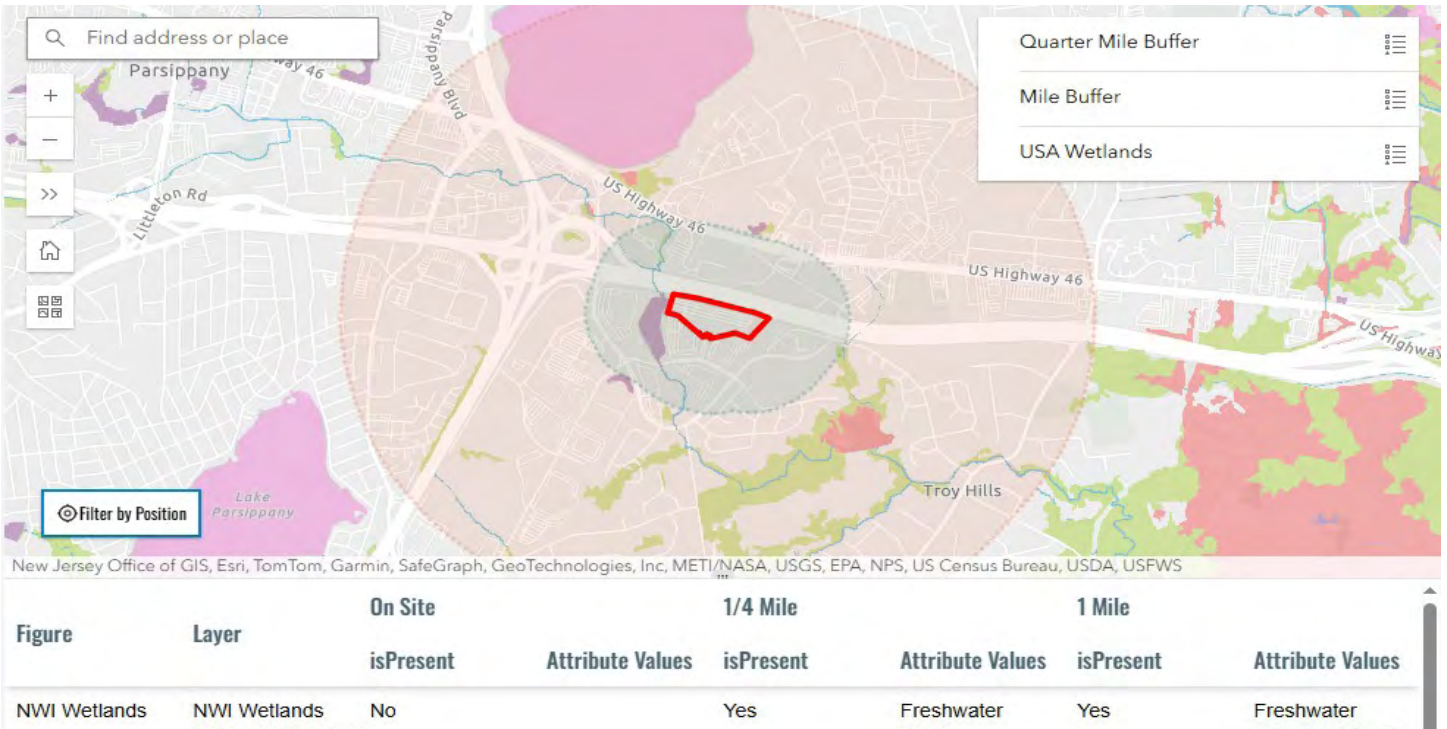

Vicki Schiavone
Project Engineer, Natural Resources

“ The quick report feature was very helpful when preparing a proposal for Due Diligence through Full Site/ Civil Design. It provided a snapshot of key site features and helped expedite the review. ”

Ashley Berninger
Project Engineer, Site/Civil

“ Site Analyzer is a valuable tool for our Central Florida Geotechnical Team. It allows us to efficiently map project sites, capture their unique characteristics, and deliver clear, informative maps to clients. ”

Bruno Bezerra de Souza
Senior Staff Engineer, Geotechnical
